CDATA CONNECT

Make it quick and easy to access live data where you need it – no movement required

When your business moves fast, you need access to live data when and where you need it. Build reports, derive insights, and streamline operations with real-time connections between your cloud systems.

Live data connectivity

CData Connect Cloud provides instant, consolidated access to live data without the burden of traditional replication methods. With minimal setup, an easy-to use interface, and high reliability, you can quickly connect to live data from across your ecosystem and finally get the full picture of your business.

Instantly connect to systems you use

Using our cloud-native service, simply login, enter the application's credentials, and begin configuring live data connections to the cloud applications you use within minutes:

- ✓ No **software** to install or configure
- ✓ No requirement for an **underlying database**
- ✓ Prebuilt connections to **250+ systems**
- ✓ **Federated data views** without the hassle of data replication

Built to be hassle-free

Built to reliably connect your data without constant monitoring and administration so data stays up-to-date without the effort:

- ✓ **Always on:** Since Connect Cloud is cloud-native and always on, you can confidently schedule your client-side reports, dashboards, and datasets to refresh automatically with the latest data

- ✓ **High Volume Processing:** Rest easy knowing Connect Cloud was built on CData platform's high performance read & write capabilities with dynamic metadata, caching, and query optimization

- ✓ **Error Logging and Notification:** Setup your connections and know you'll be proactively notified if there's any errors or issues with the jobs before users find them

- ✓ **World-class Documentation and Support:** Help is just a click away with extensive product documentation and real-time support available through chat, email, or our online community

Easy-to-use without technical expertise

Designed to be user-friendly with a point-and-click interface that makes it easy for IT and non-IT professionals alike to connect systems:

- ✓ **Point-and-Click UI:** Empower business users to self-serve their data needs with the ability to create and maintain connections without code or deep technical expertise

- ✓ **AI SQL Generation:** Use our AI SQL Generator to transform, shape, and model data using standard SQL queries across your underlying systems – whether you're a SQL beginner or expert

- ✓ **Virtual Datasets:** Create persistent, reusable datasets aggregated from multiple sources to easily combine data for reporting

- ✓ **Secure Access:** Ensure data is secure with built-in permission and governance controls like user-level select, read, write, delete, and export controls

"CData Connect Cloud connects Tableau to Google Analytics, Google Ads, and Salesforce. Now we've also got connectors set up for Pardot, LinkedIn, Instagram, Facebook, and Twitter. I have all these things all in one place with no upkeep on my end."

— **Paul Summitt,** Belden D&A IT Supervisor

BELDEN

Up-to-date financial reporting in less time

Tired of exporting multiple .CSV files from Sage and combining it with data from across systems to do your monthly or quarterly analysis? Connect Cloud is designed to instantly connect Sage with the systems and tools you need to streamline reporting.

Take the pain out of working with Sage Data

Stop spending hours wrangling data with a self-service tool you can setup and maintain – with or without the help of IT.

✓ Connect and display Sage's General Ledger, transaction-level data, and more into your operational systems or analytics tools

✓ Setup automated jobs to perform data manipulations and transformations between systems

✓ Merge Sage data with workforce, budgetary, or sales data to create persistent, reusable datasets to virtualize into reporting tools or operational systems

Sage Intacct   **Sage** 200   **Sage** BCA

Effortlessly consolidate data from across your business

Connect Cloud has out-of-the-box connectors to the most common financial, workforce, sales, and marketing tools to make it easy to consolidate enterprise data.

workday.   Acumatica   SAP ERP

upstream USA

"We would pull in our [Sage Intaact] general ledger into Power BI with CData, and it worked on the very first try. It was much easier and simpler and refreshed faster than all the other solutions that we were looking into."

– John Hatch, Senior Data, Analytics, and Technology Analyst, Upstream USA

CData Software – The leading provider of data access & connectivity solutions

CData Software is a leading provider of data access and connectivity solutions. Our self-service data products and connectivity solutions provide universal access to live data from hundreds of popular on-premises and cloud applications. Millions of users worldwide, including Salesforce, Office Depot, and Holiday Inn, rely on CData to enable advanced analytics, boost cloud adoption, and create a more connected business. Consumable by any user, accessible within any application, and built for all enterprises, CData is redefining data-driven business.
