

Connect any data across your stack

One platform for every data integration need

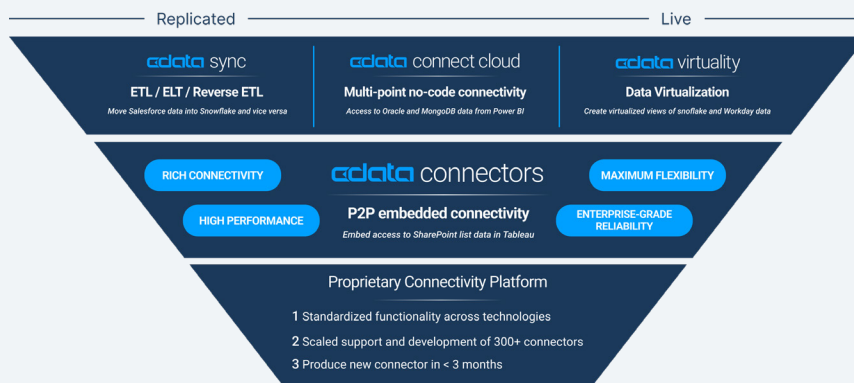

The CData connectivity platform is the only bi-modal integration stack to connect replicated and live data, providing real-time data access across enterprise apps and hybrid infrastructures. 8,000+ customers leverage CData to connect to their data when and where they need it for superior operations, insight, and decision making.

Trusted by thousands to power connectivity across their company and within their products

<h3>1.3 trillion</h3> <p>records per month</p>	<h3>2.7 billion</h3> <p>queries processed per month</p>	<h3>2,000+</h3> <p>CData powered apps</p>
--	---	---

One platform for every integration need

With 63% of ops professionals waiting weeks or months for their data, companies must find a way to better connect data across their stack faster. CData supports both live and replicated integration methods to meet the range of use cases and technical requirements.

Replicated data

Move data between systems with advanced ETL/ELT capabilities

"I can sleep again, knowing that the replication is working. If I stopped CData Sync today, I'd get flooded with calls from my teams in the next 20 minutes. The near-real-time data we get with Sync has transformed how we work in a big way."

- Irving Toledo, Holiday Inn

Live data

Access data without data movement

"Before Connect Cloud, it took multiple people almost a full day to manually collect the data we needed to produce weekly reports in Google Data Studio. Now it's just a click of a button."

- Ali Moran, MyCoach Sport Data Analyst

Built on our proprietary connectivity platform

Our products are built on the foundation of 300+ standardized data drivers, which companies like Google and Salesforce embed within their products to power data integrations for their customers. With CData, you enjoy:

- ✓ Universal driver functionality across all sources, destinations, and technologies
- ✓ Scalable, cost-effective support and maintenance for 300+ connectors
- ✓ Data connectors development cycles in < 3 months

Live data products

CData Drivers

Enable live data access between the data sources and applications powering your business with 300+ standards-based connectors. Built for popular data standards (ODBC, JDBC, ADO, NET) and popular data-centric technologies (Excel, Power BI, Python, SSIS, Tableau).

CData Virtuality

Integrate distributed and diverse data with an enterprise-grade data virtualization solution for accelerated time-to-insight. Create a semantic layer on top of your existing or new data architecture to allow quick adaptation to changing business requirements while ensuring governance. Deployment available for SaaS, on-premises, and hybrid.

CData Arc

Integrate EDI, MFT, and API workflows with your application infrastructure in the cloud or on-prem – no code required. Supports major standards for MFT (AS2, AS4, OFTP, SFTP) and EDI (X12, HL7, FHIR, EDIFACT). Rapidly connect trading partners with files, apps, and processes.

CData Connect Cloud

Grant and govern access to live cloud data to business users directly in their favorite BI, reporting, and dev tools. A fully managed cloud interface means there's nothing to install or maintain, while elastic cloud computing provides dependable performance with automatic scaling.

Replicated data products

CData Sync

Build and deploy ETL/ELT data pipelines in minutes. Use one tool to replicate data from any relational/NoSQL database or application (CRM, ERP, HCM, accounting) to every popular data store (Snowflake, S3, Redshift, SQL Server) plus Salesforce through reverse ETL. Connector-based pricing and CDC capabilities help you manage server resources and control costs.

CData Software – The leading provider of data access & connectivity solutions

CData Software is a leading provider of data access and connectivity solutions. Our self-service data products and connectivity solutions provide universal access to live data from hundreds of popular on-premises and cloud applications. Millions of users worldwide, including Salesforce, Office Depot, and Holiday Inn, rely on CData to enable advanced analytics, boost cloud adoption, and create a more connected business. Consumable by any user, accessible within any application, and built for all enterprises, CData is redefining data-driven business.
